- Location: Del Tech Park-DBI- 1 Innovation Way, Conference Room DTP, Newark
- Next Meeting: Tuesday, February 20, 2018 5:00 p.m. Conference Room DTP - 15 Innovation Way, Newark, DE 19711, Delaware Technology Park

AGENDA

- Call to Order
- DCHI Update
- HCC/SIM Update: Y4 Budget & Plan
- Behavioral Health Integration Update & Discussion
- Common Scorecard Update
- Public Comment
- Adjourn

SUMMARY OF DISCUSSION

- Feedback from the January DCHI Board meeting regarding newfound clarity on DCHI's role moving forward was shared with the Committee. DCHI aims to continue to serve as a convener, advisor, influencer, and integrator focused on:
 - Supporting new work underway;
 - Identifying gaps and areas underserved by new strategies;

- Ensuring a holistic approach and connecting the work; and
 - Sustaining impact.
- The Board also discussed Clinical Committee priority initiatives, which includes:
 - Providing guidance and feedback to the state and its implementation consultants on behavioral health integration work;
 - Identifying critical stakeholders in the community ready to volunteer; and
 - Enhancing visibility, awareness, and understanding of the behavioral health integration initiative through targeted and tailored stakeholder communications.
- The Committee will also continue to support additional initiatives such as the Common Scorecard. Long-term focus areas will include the identification of strategies that address the future of primary care in Delaware and end of life care.
- Committee members then received a brief update on the SIM grant year four operational plan and budget, which was recently submitted to CMMI for review and feedback. Year four funding will support Clinical Committee initiatives such as behavioral health integration, learnings from practice transformation, and stakeholder engagement activities.
- Committee Co-Chairs noted the need to continue conversations around establishing a behavioral health integration sub-committee or working group. Committee Co-Chairs will continue to discuss this option as well as a possible expansion of Clinical Committee membership to include additional expertise.
- Representatives from HMA provided an update on the HCC's behavioral health integration pilot program. The HMA team shared the following information with the Committee:
 - Recruitment update for first 6-month cohort of practices;
 - A list of primary care and behavioral health practices currently enrolled in the pilot program;
 - Supportive work required to ensure program success and sustainability; and
 - Next steps to include launching the collaborative technical assistance with practices and continue to recruit practices to participate in the second cohort.

- Committee members were informed the Common Scorecard will be used as consumer transparency tool at an aggregate level moving forward.

PUBLIC COMMENT

- A member of the public questioned whether the practice transformation initiative has allowed participated practices to become more efficient in the operations while realizing improved patient health outcomes.

NEXT STEPS

- N/A
