

The Ultimate Plastic Pallet

Designed for today's supply chain needs

The Cleanpal pallet is a cleaner, more hygienic alternative to the average wood pallet. This reusable, durable pallet provides more reliable performance so your supply chain can operate with fewer delays, disruptions or product damage.

Hygienic

Cleaned to the industry's highest food safety standards

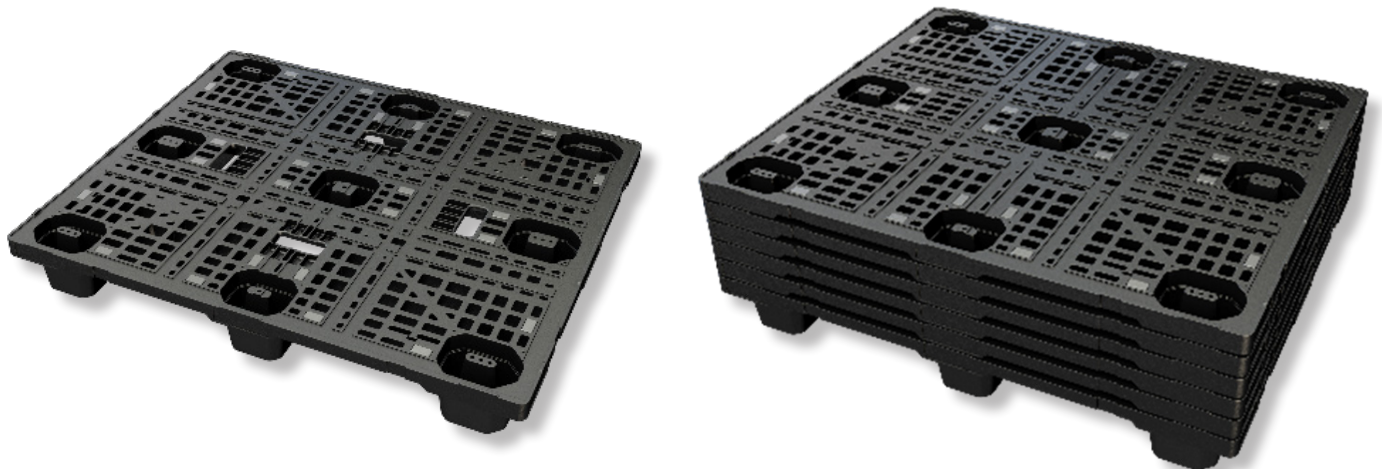

Space Saving

Cleanpal has a 3:1 nesting ratio, creating space-saving opportunities and reduced transportation costs.

Durable

Significantly less damage (1.5%) per trip compared to more than 25% for wood pallets.

Features and specifications

Nestable

Unique design reduces transport costs by 60%

Lightweight construction

Easier and safer to handle

Durable

Polypropylene plastic is a stronger alternative to wood.

Traceability

Smart pallets enable you to benefit from the value of data and insights

Interlock

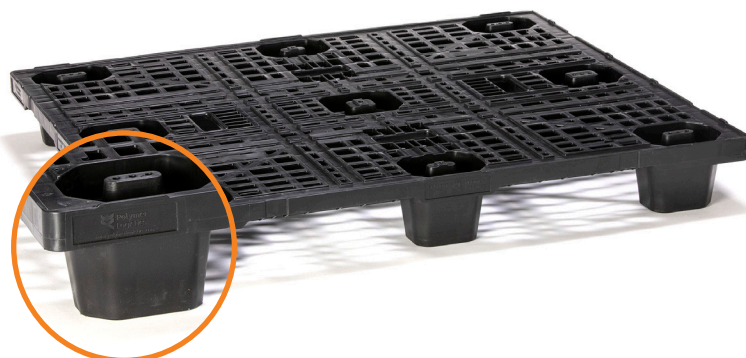

Keeps RPCs securely locked in place

Anti-slip

Strategically placed rubber pads ensure stability in storage and transit

Solid Design

Injection molded, homogenous construction is impervious to water retention, debris, or microbes

Cleanpal

Height	5.71 in
Length	48 in
Width	40 in
Weight	27 lbs
Load Capacity (Static/dynamic)	5,500/2800 lbs
Truckload quantity	1.250 pallets
