

**ZM INTERACTIVE TO SHOWCASE FULL LINE OF xFOLD™ DRONES  
AT IDEX IN ABU DHABI, UAE**  
*Drones designed for heavy cargo delivery, long-distance flights, industrial  
and military applications*

**For Immediate Release:**

**SAN FRANCISCO, CA, February 14, 2021** - US based company, [ZM Interactive \(ZMI\)](#) will be at IDEX showcasing its full line of xFold™ drones – the strongest and most adaptable drones in the industry. xFold™ drones are the only industrial unmanned aerial vehicles (UAV) that can switch between x4 (quad), x6 (hexa), X8 (octo) and X12 (dodeca) configurations in minutes.

It's simple to customize the xFold™ drone to fit any mission: Pilots can swap configurations in minutes, including adding robotic arms for delivery, extinguisher ball droppers for firefighting, sprayers for agriculture, or sensors for 3D mapping. The military-grade commercial drones are designed, manufactured, built and assembled by ZMI in the USA, using proprietary components. The aircraft are weather resistant and made to fly in inclement conditions.

The line of drones on display includes:

- **The xFold™ [Dragon](#)** can lift up to 1000 pounds, and the Dragon Hybrid boasts a flight time of 1.5 hours on battery and over 8 hours with a hybrid system. Available in five sizes, payloads for the aircraft include 100 pounds, 300 pounds, 500 pounds and 1,000 pounds, guaranteeing there is an xFold™ drone suited for every flight operation and mission.
- **The xFold™ Cinema** is designed to support professional cinematography cameras, LiDAR, or other sensors with proprietary anti-vibration technology. Flight time around 45 minutes, depending on payload.
- **The xFold™ Travel** platform is designed for flexibility with a wide range of applications, from DSLR and FLIR cameras to various sensor and payload applications. Flight time around 40 minutes, depending on payload.
- **The xFold™ Spy** features power and portability, designed for action sports cameras as well as small payloads like zoom / FLIR and other sensors for industrial applications. Flight times 35 minutes, depending on payload.

“The xFold™ drones by ZMI are built to be the strongest, most adaptable aircraft on the market today,” said ZMI CEO Ziv Marom. “We are constantly improving on our designs to make them suitable for every industry and every use. Our customers come to us with an idea and our technology continues to rise to the challenge – these capabilities are only the beginning and we have many more exciting updates to come.”

The xFold™ sUAV is suitable for a range of commercial, industrial, military and emergency-response applications. Customers already using the xFold™ drones include Dynetics, NASA JPL, Livermore Labs, Israel Defence Force, US Military, USDA, police and fire departments, as well as Bell Helicopter, which was granted FAA Experimental Registration on multiple xFold™ aircraft in 2019. xFold™ drones are being used in the US, Canada, Mexico, Europe, Asia, Africa and Israel.

View the full line of drones during IDEX at the **ZM Interactive - xFold** stand [03-C40 Hall 3](#). [IDEX](#) will happen at the Abu Dhabi National Exhibition Centre (ADNEC) 21 – 25 February, 2021.

**About IDEX:**

The International Defense Exhibition and Conference (IDEX) is the most strategically important tri-service defense exhibition in the world. IDEX is the only international defence exhibition and conference in the MENA region demonstrating the latest technology across land, sea and air sectors of defence. It is a unique platform to establish and strengthen relationships with government departments, businesses and armed forces throughout the region.

**About ZM Interactive:**

ZM Interactive (ZMI) develops and manufactures the xFold™ drone – the world’s strongest and most adaptable drone – and provides drone services for government, industrial and pro-level cinematography. For more information, please visit: <http://www.xfoldrig.com/>
