

## Bubble/No Code Developer

### Hopscotch Health is hiring!

**Role:** Bubble/No Code Developer

**Location:** Remote

**About the role:** We are looking for an experienced and passionate Bubble developer who can develop no-code software solutions by setting up and configuring systems for Hopscotch's unique requirements. You will be spending your day playing around with Application Design, Database, and its Workflow. You will be working in a team of other developers, designers and marketers, etc. to help us make health and wellness fun.

### Key-responsibilities:

- Create innovative, scalable, fault-tolerant no-code software solutions on Bubble and other no code platforms.
- Be an analytical thinker and be able to solve complex problems using no-code tools to solve challenges and create products
- Understand how to integrate APIs to Bubble projects and how to wrap Bubble in mobile or be able to use other mobile no code tools.
- Have a good eye for design details to create high class front end UI for the no-code apps.
- Overall ownership of solution implementation: be in charge of assigned projects, ensuring timely and efficient communication and solutions are delivered to plan
- Coordinate and execute testing, in concert with customers to ensure successful implementation.
- Maintain proper documentation with pseudo logics & daily updates on every project.

### Must Have:

- Should have built at least 2 apps on Bubble (or another no-code platform) and can demo them.
- A good grasp of UI and Design Workflows.
- Strong written and verbal English communication skills essential

Seniority Level: Mid-Senior

Industry: Hospital & Health Care; Mobile/Web

Employment Type: Remote Full time, Remote Contract
