We've Been Making Pickles "Four" Generations

Packing pickles is in our blood. When our family began making pickles in the early 1900's, our goal was to make the highest quality pickle at a competitive price. Today, our goal remains the same. The use of automated packaging equipment, direct contact with growers across America, and the buying power of a market leader enables Gielow Pickles to accomplish our goal.

We look forward to being your refrigerated pickle, pepper, sauerkraut and relish partner.

Foodservice Is All We Do

We know what the foodservice industry needs, because foodservice is all we do. Cool Crisp™ Pickles are all a refrigerated style pickle manufactured using advanced automated production techniques at our facility in Lexington, Michigan. This technique ensures the highest levels of food safety are met. All Gielow products are Grade A, packed with high-net drained weights for the highest quality.

It's All About The Cucumber

At Gielow Pickles quality starts with the cucumber. We work with only the finest growers in the best cucumber growing regions. All our growers use the same seed variety to ensure a uniform size and quality cucumber. Our advanced produce handling techniques and express trucking ensures that we are using only the freshest cucumbers.
