Year-Two Accomplishments
Delaware Cancer Consortium
November 2005
Brenda lost her battle with cancer this year. Her insight into the disease she fought so fiercely helped us begin our journey. We celebrate her life and feel privileged to have known her. Her courage was an inspiration to all of us. We can’t think of anything more fitting than to dedicate this progress report to her.
Thank You

The committee members of the Delaware Cancer Consortium are volunteers who come from all walks of life. They have contributed their insight, their ideas, and hundreds of hours of their time to reduce the burden of cancer in Delaware. We appreciate all they have done on behalf of all of us.

TABLE OF CONTENTS

THE BIG PICTURE ........................................1
YEAR-TWO ACCOMPLISHMENTS (BY COMMITTEE) ......7
APPENDIX ................................................57
THE FOUR-YEAR PLAN that was developed by the Governor’s task force set forth ambitious goals—goals that would help us lower the threat of cancer to all people in our state. This report to you—the people of Delaware—shows the remarkable progress that has been made in just two years. Especially impressive are the implementation of programs to address colorectal cancer and the new program that pays for cancer treatment for the uninsured. You’ll also notice that the unequal burden borne by racial and ethnic minorities remains our central focus. The impact is noted in every task. But none of this would have been possible without the funding approved by the legislature and Governor’s office. It is because of their support—and the allocation of those state funds represented in this report—that we have been able to make such headway. But there is still work to do. We look forward to tackling the remaining objectives—those mandated for completion in years three and four—with equal determination.

How to read this book

Turning Commitment into Action reports on the work accomplished by the Delaware Cancer Consortium over the past year. The format of the book follows the initial report of the Delaware Advisory Council on Cancer Incidence and Mortality published in 2002 and Year-One Accomplishments published in 2004.

Each recommendation for Delaware’s cancer control plan is clearly stated.

1. The first block under the recommendation lists those tasks that were accomplished in year one.

2. The second block notes achievements made over the past year. Listed are the tasks and activities, the responsible party, timeframe, costs and potential sources for funding. A DONE stamp indicates projects that were completed in year two or ongoing activities that were started in year two.

3. A third block lists the tasks and activities that will be tackled in the coming year. Following the format of earlier reports, the book continues to list the tasks and activities by the numbers assigned to them in the original book.

4. Finally, funding for the tasks and activities is provided by state funding, unless otherwise noted. Original source recommendations may differ from actual funding sources.

Throughout the report, the effect each task and activity has on disparities, those populations that shoulder an unequal cancer burden, is marked using a simple key.
Cancer rates continue to fall in Delaware. Both the death and incidence rates for African Americans versus Whites remain high, but the difference between the two is smaller than that reported for the U.S.

CANCER IN DELAWARE—THE BIG PICTURE

CANCER INCIDENCE AND MORTALITY AVERAGE ANNUAL AGE-ADJUSTED RATES PER 100,000, DELAWARE AND U.S.

PERCENTAGE THAT AFRICAN-AMERICAN CANCER RATES EXCEED WHITE RATES BASED ON AGE-ADJUSTED RATES PER 100,000, DELAWARE AND U.S.

DELAWARE AGE-ADJUSTED INCIDENCE RATE PER 100,000 AS PERCENTAGE ABOVE U.S. ESTIMATE FOR 1995–2001

National Average is represented by SEER (Surveillance, Epidemiology and End Results) Registries, a program of the National Cancer Institute.
WHAT HAS BEEN DONE:
We have introduced services, education, and legislation that limit cancer risks for all people in Delaware.

INCREASE SCREENING FOR AND EARLY DETECTION OF COLORECTAL CANCER

• Screened 285 uninsured or underinsured Delawareans through Screening for Life; removed polyps from 60 patients
• Distributed more than 400 Champions of Change tool kits to reach the African-American community
• Installed CRC nurse program screening coordinators in five Delaware hospitals to help people get screened

PROVIDE THE HIGHEST QUALITY OF CARE FOR EVERY DELAWAREAN DIAGNOSED WITH CANCER

• Established a $1 million annual allocation to train and place statewide cancer care coordinators to link patients with medical and support services
• Amended Section 3559 G (a)(3)(c) of the Delaware Code and Regulation 69.505 3 to include cancer prevention trials
• Conducted statewide, broad-based community education programs on end-of-life choices, including long-term, palliative, and hospice care

REDUCE TOBACCO USE AND EXPOSURE

• Funded comprehensive, statewide tobacco prevention programs above the recommended minimum
• Enforced the Delaware Clean Indoor Air Act
• Strongly endorsed, coordinated, and implemented “A Plan for a Tobacco-Free Delaware”
• Implemented the CDC tobacco model for schools
• Expanded tobacco awareness and cessation campaigns
• Maintained and enhanced integrated cessation programs
• Educated the legislature about an excise tax increase
PAY FOR CANCER TREATMENT FOR THE UNINSURED

• Registered 79 uninsured Delawareans in the Delaware Cancer Treatment Program
• Renewed commitment to pay for cancer treatment for uninsured Delawareans with the addition of $5 million dollars

INCREASE KNOWLEDGE AND PROVIDE INFORMATION

• Established health councils at the district and school levels
• Began research related to risk factors and preventable cancer cases and deaths
• Amended the Cancer Control Act
• Increased information on Delaware Cancer Registry
• Fully staffed the Delaware Cancer Registry

REDUCE THE THREAT OF CANCER FROM THE ENVIRONMENT

• Researched and identified cancer-causing substances used indoors; started process to educate public about the risks to help them limit exposure
• Developed a campaign to recommend radon testing for all Delawareans
• Initiated studies of public and well water and fish to determine carcinogen levels

ELIMINATE THE UNEQUAL CANCER BURDEN

• Continued to focus on closing the gap for large disparity groups
• Worked with the Colorectal Committee to distribute more than 400 Champions of Change tool kits to reach the African-American community
DELAWARE’S CANCER PROGRAM IS GETTING NOTICED

The hard work of the members of the Delaware Cancer Consortium, Governor Ruth Ann Minner, the legislature, and everyone involved in the First State’s unrelenting fight against cancer has been noticed and applauded in a variety of ways.

As a result of her leadership of the Delaware Cancer Consortium, Delaware Governor Ruth Ann Minner has:

- Received an invitation from former President and C-Change co-chair, George H. W. Bush, to serve on C-Change, an organization comprised of the nation’s key cancer leaders from government, business, and nonprofit sectors. These cancer leaders share the vision of a future in which cancer is prevented, detected early, and cured, or is managed successfully as a chronic illness.

- Been recognized by the Council of State Governments (CSG), the premier multi-branch organization forecasting policy trends for the community of states, commonwealths, and territories on a national and regional basis. CSG promotes excellence in decision-making and leadership skills and champions state sovereignty. She was also featured in an article about cancer in CSG’s main publication.

- Been honored by the American Cancer Society with the prestigious 2005 National Distinguished Advocacy Award for her work on the Clean Indoor Air Act.

The American Lung Association national office gave Delaware good marks on its annual state report card, which grades and ranks states on several criteria. Delaware received a grade of “A” for smoke-free indoor air and commitment to fund tobacco prevention and control programs. The First State also received good marks for limiting youth access to tobacco.

The extensive marketing campaign created to increase screenings for colorectal cancer was featured in two national publications, *Healthcare Advertising Review* and *Profiles in Healthcare Marketing*.

DISPARITIES COMMITTEE
The dedicated group of volunteers who make up the Delaware Cancer Consortium continues to work to find answers about cancer in Delaware. We’ve had early successes as well as moments of frustration. Through it all the faces of those Delawareans who shared their stories with us in the beginning of this process are with us. They continue to be our driving force.

We’ve made great progress. Some of our accomplishments are visible—a cancer treatment program for the uninsured and colorectal cancer screening program coordinators who work from five hospitals throughout Delaware to help increase screening. Other achievements involve a tremendous amount of work behind the scenes, such as the quality committee’s work to develop the credentialing program, environmental evaluations, and daily outreach to communities in need. Although not in the limelight, this work is equally important in our vigilant fight against cancer.

This report chronicles the work of the Delaware Cancer Consortium over the past year. It measures our progress and keeps us focused on the goals set in our four-year plan to lower the threat of cancer to all Delawareans. The passion and devotion of the Consortium members, the legislature, the dedicated Division of Public Health staff, and involved community groups, although not easily captured in a report, remain steadfast.

You have our word that we will do whatever it takes to win.
Create and maintain a permanent council, managed by a neutral party, that reports directly to the Governor to oversee implementation of the recommendations and comprehensive cancer control planning. The council should have medical, environment, research, policy, and education committees that continually evaluate and work to improve cancer care and cancer-related issues in Delaware.

ALREADY ACCOMPLISHED, YEAR 1

1. Reconstituted and made permanent the Delaware Advisory Council on Cancer Incidence and Mortality, which reports directly to the Governor
2. Disbanded DHSS’s Advisory Council on Cancer Control as authorized in current legislation and replaced with DCC
4. Solicited participation of all stakeholders for DCC; provided clear definition of member expectations, roles, and responsibilities

The cost of treating cancer can be devastating for the uninsured. So much so that some Delawareans without insurance don’t get regular mammograms, prostate cancer screenings, or colonoscopies because, if they are diagnosed with cancer, they believe there is nothing they can do about it. The Delaware Cancer Treatment Program has changed all of that. Established in 2004, it has already impacted the lives of 79 individuals. The commitment to the program was renewed by allocating funds in the budget to pay for treatment in the coming year for any uninsured Delawareans who have been diagnosed with cancer and are at or below 650% of the Federal Poverty Level. It is a landmark effort—one that is being recognized nationally.

“I was diagnosed with cancer after a tumor was discovered in my leg. I had just gone through a very bad time—and could not afford insurance where I worked. I have to thank the governor for providing this wonderful program. I’ve had surgery to remove the tumor, radiation and chemo. It was all covered by the Delaware Cancer Treatment Program. I don’t know what I would have done without their help.” | Gloria Francer, West Dover

WE’VE INCREASED OUR REIMBURSEMENTS FOR THE UNINSURED.

The cost of treating cancer can be devastating for the uninsured. So much so that some Delawareans without insurance don’t get regular mammograms, prostate cancer screenings, or colonoscopies because, if they are diagnosed with cancer, they believe there is nothing they can do about it. The Delaware Cancer Treatment Program has changed all of that. Established in 2004, it has already impacted the lives of 79 individuals. The commitment to the program was renewed by allocating funds in the budget to pay for treatment in the coming year for any uninsured Delawareans who have been diagnosed with cancer and are at or below 650% of the Federal Poverty Level. It is a landmark effort—one that is being recognized nationally.

We want to use the groundbreaking Delaware Cancer Treatment Program to help as many as 175 uninsured Delawareans in FY ’06.
Reimburse the cost of cancer treatment for every uninsured Delawarean diagnosed with cancer up until one year after diagnosis.

**ALREADY ACCOMPLISHED, YEAR 1**

1. Established a $5.0 million annual allocation for cancer treatment of the uninsured

“I saw blood in my stool. I was afraid to find out what that meant. I had a colonoscopy through Screening for Life and learned I had cancer. It was a level one tumor. The Delaware Cancer Treatment Program paid for surgery. It if weren’t for them, I would literally be waiting to die.”

Our educational marketing campaign and community outreach by colorectal cancer screening program coordinators and program advocates have helped increase both the number of people getting screened and the level of awareness. We’ve also continued to build our efforts to work with healthcare professionals and employers. Working with the disparities committee to reach populations in need of screening also continues to be a top priority for the committee. One of our primary goals for Year 3 is implementing an evaluation tool to help us learn how well our programs are working and how we can improve our outreach to those most in need.

More people are getting tested for colorectal cancer.

In 1999, percent of Delaware adults age 50 and older, by race, reporting ever having a sigmoidoscopy or colonoscopy:
- African American 39.6%
- Hispanic 19.0%*
- White 45.3%

In 2004, percent of Delaware adults age 50 and older, by race, reporting ever having a sigmoidoscopy or colonoscopy:
- African American 58.4%
- Hispanic 65.4%*
- White 62.3%

*Note: Small sample size for Hispanic adults reduces validity of estimates for Hispanic adults over 50. The differences for whites and African Americans are statistically significant.

Sources:
Delaware Cancer Registry.
Create a comprehensive statewide colorectal cancer screening and advocacy program.

ALREADY ACCOMPLISHED, YEAR 1 AND 2

1. Reached out to the six major health systems serving adult populations (Nanticoke, Beebe, Bayhealth, Christiana Care, Veterans Hospital, and St. Francis) to participate in a comprehensive, community-focused colorectal cancer screening and advocacy program.

2. Develop an evaluation plan
   - RESPONSIBLE PARTY: DHSS
   - TIMEFRAME: Year 1 and ongoing
   - COSTS: Recommended: $50,000
     Allocated: $50,000
   - POTENTIAL SOURCES: Delaware Health Fund, proposed tobacco excise tax, existing resources

3. Hire project screening advocates
   - RESPONSIBLE PARTY: Health systems
   - TIMEFRAME: Year 2
   - COSTS: Recommended: $250,000
     Allocated: $250,000
   - POTENTIAL SOURCES: Delaware Health Fund, proposed tobacco excise tax, existing resources

4. Market project and services
   - RESPONSIBLE PARTY: DHSS, health systems
   - TIMEFRAME: Year 2 and ongoing
   - COSTS: Recommended: $100,000
     Allocated: $0
   - POTENTIAL SOURCES: Delaware Health Fund, proposed tobacco excise tax, existing resources

5. Project start-up
   - RESPONSIBLE PARTY: All
   - TIMEFRAME: Year 2
   - COSTS: Recommended: $125,000
     Allocated: $125,000
   - POTENTIAL SOURCES: Delaware Health Fund, proposed tobacco excise tax, existing resources

6. Operational support
   - RESPONSIBLE PARTY: DHSS
   - TIMEFRAME: Year 1 and ongoing
   - COSTS: Recommended: $25,000
     Allocated: $25,000
   - POTENTIAL SOURCES: Delaware Health Fund, proposed tobacco excise tax, existing resources

DHSS continues to provide staff support for the CRC committee and oversight for the screening coordinators and advocates.

EFFECT ON DISPARITIES

- POSITIVE
- NEGATIVE
- NEUTRAL

Points to Note:
- Each program will include at least one full-time professional position of “Project Screening Nurse Coordinator” housed within the hospital system. The Nurse Coordinator works with communities and organizations within the surrounding area to develop and oversee the program according to the specific needs of each.
- The Nurse Coordinator will be responsible for providing culturally sensitive outreach and recruitment, ensuring screening access and scheduling, monitoring screening compliance, and ensuring prompt clinical evaluation and follow-up to positive testing.

We’re focused on establishing increased measurement—to get a sense of the number of private CRC screenings that take place throughout the year and to develop a third-party evaluation tool to measure our database.
Reimburse for colorectal cancer screening of uninsured Delawareans age 50 and older.

**ALREADY ACCOMPLISHED, YEARS 1 AND 2**

1. Established a $1.5 million annual allocation to colorectal cancer screening for the uninsured
2. Established a system for billing and payment for colorectal cancer screenings whereby funds would be paid directly to health providers for reimbursable services based on Medicare rates

<table>
<thead>
<tr>
<th>TASK/ACTIVITY</th>

Environment Committee
Disparities Committee
Lung cancer continues to be the leading cause of cancer deaths in both men and women in Delaware. The use of tobacco is the number-one cause of lung cancer. But we are making headway in our efforts to change those statistics. For the past three years, the Delaware Health Fund has provided $10 million for comprehensive tobacco prevention and control programs. Delaware is one of only three states to provide funding for comprehensive tobacco prevention and control programs at the CDC’s minimum recommended levels. Through our efforts the General Assembly passed the Clean Indoor Air Act to eliminate exposure to secondhand smoke indoors in public places and workplaces. We’ve increased our education efforts to encourage individuals to reduce exposure to secondhand smoke at home and in cars. We’ve created a program that Delawareans can call to quit smoking—the Delaware Quitline, which has received 11,500 calls since its inception. We’ve initiated more prevention efforts in schools and communities. Youth smoking rates have continued to decline, and now most doctors—75%—are talking with their patients about quitting smoking. But there’s still more we can do. Although we’ve increased the excise tax on cigarettes to keep our children from picking up the habit, the amount is below the recommended minimum and much lower than other states around us. To continue to make an impact, we have to stay focused on our goal to keep tobacco of any kind from affecting the health of every Delawarean.

“I joined the Kick Butts Generation at Central Middle in Dover. I did it mostly because my Mom smokes and I don’t like it. We had a Know the Facts Week at school that talked about how bad it is for you. We gave out numbers about how much it cost and what else you could do with the money. We do things like that all the time. A lot of kids don’t smoke like before. It’s really gross. It’s just not cool any more to smoke.” — AMBER LAMPKINS, DOVER

WE’RE REDUCING TOBACCO USE AND EXPOSURE.
At a minimum, fund comprehensive statewide tobacco control activities at $8.6 million (CDC-recommended minimum).

CDC-recommended funding levels are 7 years old. Many of the recommendations are based on state population and service costs, both of which have increased.

Delaware is one of four states that exceed CDC recommendations. (See #1.)

Delaware Health Fund meetings are open to the public. Information on meetings and budgets is available on the DHSS Health Fund website at http://www.state.de.us/dhss/healthfund/.

We want to continue to be

*a national leader for tobacco prevention.*
Strengthen, expand, and enforce Delaware’s Clean Indoor Air Act to include public places and workspace environments.

ALREADY ACCOMPLISHED, YEAR 1

1. Advocated passage of a strong anti-exposure to Environmental Tobacco Smoke (ETS) law, Senate Bill 99 as originally written (An Act to Amend Title 16, Delaware Code Relating to the Clean Indoor Air Act, 2001)
2. Mobilized the support of governmental offices and other resources together and disseminate relevant data
3. Continued grassroots support efforts begun in 2001
4. Began public polling to assess support for proposed legislation
5. Communicated with those opposed to new legislation to ensure correct information and understanding

<table>
<thead>

</table>

Continuing. IMPACT and DCC have updated and created tobacco prevention priorities.

A Tobacco Prevention and Education Evaluation Advisory Committee has been established. An evaluation plan is being developed based on the state tobacco plan.

We’re going to continue to

*make tobacco use socially unacceptable so people aren’t tempted to start smoking.*

EFFECT ON DISPARITIES

⊕ POSITIVE ☺ NEGATIVE ☐ NEUTRAL
Formally adopt, implement, and enforce the CDC model policy for tobacco control in all Delaware schools.

**ALREADY ACCOMPLISHED, YEAR 1**

1. Reeducated school leadership regarding the content and merits of the CDC model school policy
   (“A Coordinated School Health Program: The CDC Eight Component Model of School Health Programs” 2001)
2. Obtained administration’s support for model policy adoption
3. Drafted legislation requiring model adoption
4. Implemented the model (including education and enforcement components)

We’re working to prevent *tobacco use among young Delawareans*.

**POINTS TO NOTE:**

An existing federal mandate prohibits the use of tobacco products at any time on properties that serve children and receive federal funds.
We're working to increase the number of tobacco cessation programs available to citizens who smoke.

Campaigns target priority and disparate populations. Evaluation of new scientific data has been reviewed to include in new marketing strategies. New marketing strategies have increased usage of Quitline services.

Launched a web-based cessation site, www.de.quitnet.com. The site provides premium-level cessation resources and services for Delawareans online.

Coordinated year-round marketing strategies continue.

Expanded face-to-face counseling services by training other healthcare professionals in addition to pharmacists. For six months, free pharmaceutical aids were provided to everyone who participated in a Quitline program.

POINTS TO NOTE:
- As proven interventions become available, cessation services specifically targeting youth and young adults should be expanded.
- Resources used to formulate the recommendation: Hopkins, Husten et al. 2001; Healthy Delaware 2010

EFFECT ON DISPARITIES
Increase the Delaware excise tax on tobacco products to be comparable to bordering states and seek to identify other potential funding sources to support tobacco and cancer control efforts.*

ALREADY ACCOMPLISHED, YEAR 1

4. Conducted community polling
5. Implemented grassroots awareness/support campaign
6. Conducted public awareness campaign
7. Educated General Assembly

<table>
<thead>
<tr>
<th>TASK/ACTIVITY</th>
<th>RESPONSIBLE PARTY</th>
<th>TIMEFRAME</th>
<th>COSTS</th>
<th>POTENTIAL SOURCES</th>

<td>None</td>
<td></td>
</tr>
<tr>
<td>8. Pass legislation increasing state tobacco excise tax</td>
<td>General Assembly</td>
<td>Year 2</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Reflects new tobacco plan objective. Current excise tax is $0.55 per pack. Delaware ranks 35th in excise tax per pack. Bordering states’ tobacco excise tax: NJ = $2.40; PA = $1.35; MD = $1.00. Average of bordering states is $1.58. Bordering states also have state sales tax added; Delaware has no state sales tax.

Continuing. This is an important issue for the DCC.

POINTS TO NOTE:

* Original recommendation: Increase the Delaware excise tax on tobacco products to $0.74 and seek to identify other potential funding sources to support tobacco and cancer control efforts.
YEAR TWO ACCOMPLISHMENTS

DELAWARE CANCER CONSORTIUM

INSURANCE COMMITTEE

COLORECTAL CANCER COMMITTEE

TOBACCO COMMITTEE

QUALITY COMMITTEE • Care Coordination Subcommittee • Credentialing Subcommittee

INCREASE KNOWLEDGE & PROVIDE INFORMATION COMMITTEE

ENVIRONMENT COMMITTEE

DISPARITIES COMMITTEE
We have instituted a new care coordinator program to help patients who have been diagnosed with cancer navigate their way through the health care system. This group of patient advocates will be instrumental in helping alleviate the burden of finding care that falls on those without resources or knowledge to seek them for themselves. Delaware Code has been amended to allow more clinical trials locally so that those who have been diagnosed with cancer can participate in cutting-edge advances in cancer treatment. And end-of-life-care education for health professionals has been funded to help health care providers understand the sensitive issues that those diagnosed with terminal cancer—and their families—are dealing with.

**IMPORTANT STATISTICS:**

The cost of care in the first six months of treatment is 33% less when cancers are found in the early stage (in situ) rather than the late stage (distant).

Provide a care coordinator who is part of a statewide-integrated system to every person diagnosed with cancer in Delaware. Care coordinators will be culturally competent to overcome the language, ethnicity, and gender barriers.

<td>Delaware Health Fund, proposed tobacco excise tax</td>
</tr>
</tbody>
</table>

Care coordinators hired by each hospital system in the state.

Care coordination program continues and grows. Care coordinators meet monthly. Policies, procedures, and practices developed and monitored on an ongoing basis. Training provided throughout the year.

Cancer care coordination program has enrolled and served 2,280 Delawareans through the provision of at least 6,618 personal interventions in the form of service referrals, psychosocial services, financial assistance, and other enabling and coping supports.

EFFECT ON DISPARITIES

- POSITIVE
- NEGATIVE
- NEUTRAL
Recently passed legislation ensures insurance coverage for treatment through clinical trials. This recommendation adds prevention clinical trials to those covered services.

Ensure insurance coverage for state-of-the-art cancer clinical trials.

**ALREADY ACCOMPLISHED, YEAR 1**

2. Encouraged the involvement of all seven major Delaware health systems (Nanticoke, Beebe, Bayhealth, Christiana Care, Veterans Hospital, A.I. duPont Hospital for Children, and St. Francis) in the establishment of a statewide Cooperative Oncology Group in keeping with the American Cancer Society and the Coalition of National Cooperative Groups: A partnership for Cancer Clinical Trials

<td>DCC—Quality Committee, contracted vendor, third-party payors</td>
<td>Year 1 and ongoing</td>
<td>Recommended: $210,000 annually Allocated: $0</td>
<td>Third-party payors</td>
</tr>
</tbody>
</table>
  - all data elements required by third-party payors
  - all appropriate cancer screening, diagnosis, and treatment data elements
  - education of medical providers and office staff
  - practice reviews/data collection
  - development of practice-specific recommendations
  - individualized coaching for improvement
  - evaluation and reporting of progress to DCC

Vendor completed assessment on a statewide sample of physician practices. Findings are in review and will form the basis of recommended DCC/Quality activities for YR4.

### Points to Note:

Practices are currently evaluated by individual third-party payors on the content of their records, but effective feedback on how to improve screening methods is lacking. Centralizing the review process would eliminate duplication of efforts and decrease costs. The educational feedback to the individual practices would be comprehensive in nature tailored to their needs, and focused on improving cancer-screening rates.
Support training for physicians and other health care providers in symptom management and end-of-life care approaches.

<td></td>
</tr>
</tbody>
</table>

In development in concert with developing care coordination program.

Variety of statewide educational sessions conducted in Year 3.

We want to evaluate the state of pain management so patients have a better quality of life.

**POINTS TO NOTE:**

EPEC and ELNEC are nationally recognized programs that educate physicians and nurses in essential clinical competencies around end-of-life care. Existing efforts include Delaware End-of-Life Coalition, Christiana Care Health System, and Delaware Hospice. This recommendation seeks to enhance existing programs. Coordination with existing Continuing Medical Education (CME) sources throughout Delaware could enhance education to the medical community.

DISPARITIES COMMITTEE
“An effective cancer registry forms the backbone and infrastructure of a successful cancer program. The registry can help pinpoint areas that need improvement in patient cancer care. It is also dependent on the cooperation of physicians to supply accurate and timely information.”

Nicholas Petrelli, M.D., Medical Director
Helen F. Graham Cancer Center, Newark

WE’RE PROVIDING RELIABLE AND USABLE CANCER INFORMATION.

Data collection has been completed that gives us more information about how and why the cancer incidence and mortality rates differ between the disparate populations in Delaware. This information is helping us develop better plans for reaching the ethnicities, genders, and socioeconomic levels represented by those who fall in the larger risk categories. We will be better able to understand how to help people identify their own risks, seek diagnostic testing, learn how to avoid future risks, and reduce the mortality rates for cancer.
Form a statewide, permanent alliance to coordinate and promote public education on cancer.

</tbody>
</table>

We are continuing to improve data collection to measure our efforts and steer us in the right direction.
Improve the collection and reporting of cancer incidence and mortality data.

**ALREADY ACCOMPLISHED, YEAR 1**

1. Amended the Cancer Control Act to extend the time interval within which a newly diagnosed cancer case must be reported to DPH to 180 days, consistent with standards of the American College of Surgeons
2. Enforce reporting requirements; impose fines for nonreporting
3. Introduce and pass legislation requiring hospitals to staff their registries with a certified tumor registrar
4. Reclassify the director position of Delaware Cancer Registry to a higher pay-grade
5. Expand population-based survey of present and past tobacco use and exposure to environmental tobacco smoke (ETS); report statistically valid results by age, race, income, educational level, occupation, gender, and zip code
6. Develop a public education campaign on cancer rates and their age-adjustment to the 2000 U.S. standard population
7. Evaluate the ability to standardize race and ethnicity data collection across cancer-related data sets
8. Evaluate the ability to match cancer incidence and mortality records, including special software, and develop matching capabilities

“A great deal of research has been completed. We’re learning the facts about everything from air quality to water and fish issues. It’s the first time information of this kind has ever been compiled. An awareness campaign is planned to educate the general population about indoor air dangers and what they can do to avoid them.” | Deborah Brown, CHES
American Lung Association of Delaware

WE’RE REDUCING THE THREAT OF CANCER FROM THE ENVIRONMENT.

We have conducted research and identified avoidable carcinogens that Delawareans may be exposed to in indoor and ambient environments. New statewide efforts are being developed to communicate the risks of cancer from these substances to every Delawarean. Included in the program is a campaign that recommends every household with a basement be tested for radon—a radioactive gas that has been proven to cause cancer. We have initiated specialized ambient air quality monitoring to determine actual concentrations of air toxins in Delaware. We have also instituted studies of air quality, public water, well water, and fish from the bay and the carcinogens that may be present in them.

Our efforts continue to be directed toward working with DNREC to establish air quality levels that protect Delawareans from air toxins.
Reduce exposure to carcinogenic substances in the ambient environment.

**ALREADY ACCOMPLISHED, YEARS 1 AND 2**

<td>DHSS</td>
<td>Year 4 and ongoing</td>
<td>Existing resources</td>
<td></td>
</tr>
</tbody>
</table>

Phase I is on target to be completed on time in September 2006. Phase II is scheduled to start in October 2006.

Once the findings are compiled for the assessment of the aquifer noted above, an analysis should indicate the contaminants in this aquifer that are of concern. At that time, a literature search will determine which of these contaminants are carcinogenic. The target organs for these carcinogens will also be identified from animal and human studies. The Delaware Cancer Registry will be used to assess cancer incidents and mortality in related organs. This part of the project is a secondary step which must have Phase 1 completed before it can be undertaken.

This activity is dependent upon the completion of Phase I of B.2. The evaluation will be completed in Year Four.

B4. Notify the public of past and current levels of carcinogenic substances that are monitored in Delaware | DHSS, DCC | Year 2 and ongoing | Existing resources | |

Delawareans served by public water drinking systems received the annual consumer confidence report in July. The report identifies every contaminant detected in the water during calendar year 2005.

B5. Acting on the information from monitoring, develop and implement strategies to reduce water contamination from those sources | DHSS, DCC | Year 2 and ongoing | Existing resources | |

Forty-one systems with chemical contaminants above the maximum contaminant level were issued public notices and required to submit correction action plans to remove the contaminant (during the timeframe April 2005 to April 2006).

</tbody>
</table>

Legislation passed June 2005.

A Request for Proposal was developed to facilitate and set the parameters for a statewide risk assessment of hazardous substances in the workplace as required by House Bill 219.

Educational and consultation services for employers and employees in the public sector will be identified by the study of the statewide risk assessment of hazardous substances in the workplace.

Delaware Cancer Consortium

Insurance Committee

Colorectal Cancer Committee

Tobacco Committee

Quality Committee

Increase Knowledge & Provide Information Committee

Environment Committee

Disparities Committee
In Delaware, the African-American community has been shown to have higher death rates due to cancer than any other population segment. We are working with every committee in the Consortium to eliminate the gap. Screening for Life, Champions of Change, the Delaware Cancer Treatment Program, and all of their supportive materials continue to help us address the problem.

"I work with the disadvantaged—I like to say my church is really 100,000, all of the homeless people in the area. Champions of Change gives us information we don’t get in the mainstream. It is a great opportunity to get the word out to people, giving them insurance and medical service information that could save their lives.”

WHEREAS, the Delaware Advisory Council on Cancer Incidence and Mortality (the “Advisory Council”) was created by Senate Joint Resolution 2 of the 141st General Assembly; and
WHEREAS, the Advisory Council issued a report in April, 2002 containing a series of recommendations to reduce the incidence and mortality of cancer in Delaware; and
WHEREAS, the Advisory Council’s recommendations cover a period of five years from the date of its report, and involve the active participation of many members of the public and private sectors; and
WHEREAS, it is important that an entity be established to advocate for and monitor achievement of the Advisory Council’s recommendations;

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF DELAWARE:

Section 1. Amend §133, Title 16, Delaware Code, by deleting subsection (b), and replacing it with the following:
“(b) The Delaware Cancer Consortium (“Consortium”) shall coordinate cancer prevention and control activities in the State of Delaware. The Consortium will:
Provide advice and support to state agencies, cancer centers, cancer control organizations, and health care practitioners regarding their role in reducing mortality and morbidity from cancer.
Facilitate collaborative partnerships among public health agencies, cancer centers, and all other interested agencies and organizations to carry out recommended cancer control strategies.
On at least a biennial basis, analyze the burden of cancer in Delaware and progress toward reducing cancer incidence and mortality.

Section 2. Amend §133, Title 16, Delaware Code, by adding the following new subsections:
(d) The Consortium’s permanent membership shall be as follows:

(i) Two representatives of the Delaware House of Representatives and two representatives of the Delaware State Senate (one selected by each caucus);

(ii) One representative of the Governor’s office;

(iii) The Secretary of the Department of Health and Social Services or his or her designee;

(iv) One representative of the Department of Natural Resources and Environmental Control;

(v) One representative of the Medical Society of Delaware to be appointed by the Governor;

(vi) One professor from Delaware State University or the University of Delaware, to be appointed by the Governor;

(vii) Two physicians with relevant medical knowledge, to be appointed by the Governor;

(viii) One representative of a Delaware hospital cancer center to be appointed by the Governor;

(ix) Three public members with relevant professional experience and knowledge, to be appointed by the Governor.

(e) Appointees to the Consortium shall serve at the pleasure of the person or entity that appointed them.

(f) The Consortium’s permanent members may enact procedures to appoint additional persons to the Consortium.

(g) The Consortium shall have a chair and a vice-chair, to be appointed from among the permanent members by the Governor and to serve at the pleasure of the Governor. Staff support for the Consortium shall be provided by the Delaware Division of Public Health.”

SYNOPSIS

This legislation creates the Delaware Cancer Consortium, a collaborative effort between private and public entities designed to implement the recommendations of the Delaware Advisory Council on Cancer Incidence and Mortality.

Author: Senator McBride
BACKGROUND

Formation of the Delaware Cancer Consortium

The Delaware Cancer Consortium was originally formed as the Delaware Advisory Council on Cancer Incidence and Mortality in March 2001 in response to Senate Joint Resolution 2 signed by Governor Ruth Ann Minner. The advisory council, consisting of 15 members appointed by the governor, was established to advise the governor and legislature on the causes of cancer incidence and mortality and potential methods for reducing both. The advisory council was later expanded and its name changed to the Delaware Cancer Consortium (DCC) in SB102.

Developing a Plan for Action

DCC began meeting in April 2001 with the shared understanding that their work would be focused on developing a clear and userable cancer control plan. Another shared priority was that extensive input would be needed from professionals in cancer control, as well as from Delaware citizens affected by cancer. With these priorities in mind, DCC worked on a system to:

- create a shared awareness and agreement on the range of cancer control issues to be addressed now and in the future;
- create a structure and agenda for addressing these needs;
- enable Delaware to move forward with meaningful action for its citizens.

To accomplish these goals, DCC heard from speakers on Delaware cancer statistics, including Dr. Jon Kerner from the National Cancer Institute, and began monthly presentations from Delaware cancer survivors or family members who had lost a loved one to cancer. The stories, woven throughout this report, provided valuable insight into some of the concerns and barriers faced by people battling cancer, the stress this disease places on all aspects of their lives, and ideas for ways that Delaware can help ease these burdens on its citizens.

A unique project, called Concept Mapping, was also initiated to get input on cancer issues from Delaware citizens and to help DCC establish priorities and its scope of work. DCC invited more than 195 Delaware citizens who are invested in cancer control efforts to participate in the project. Both DCC and those invited completed the brainstorming phase, during which they provided their ideas on completing the statement: “A specific issue that needs to be addressed in comprehensive cancer control in Delaware is….” Over 500 statements were submitted, and editing of these to avoid duplication resulted in 118 ideas about controlling cancer in Delaware. These ideas were then rated, relative to each other, on importance and feasibility.

Development of Subcommittees and Recommendations

From the results of the Concept Mapping activity and the numerous speakers, the DCC developed a clear set of priorities and established six subcommittees to address these issues. Each subcommittee, chaired by a member of DCC, was provided with a list of priorities in its focus area, from which specific recommendations were developed. DCC carefully reviewed the work of the subcommittees, made modifications or additions as needed, and the resulting final recommendations are compiled in this report.
DELAWARE ADVISORY COUNCIL ON CANCER INCIDENCE & MORTALITY MEMBER LISTING

William W. Bowser, Esquire (Chair)
Young Conaway Stargatt & Taylor, LLP

The Honorable John C. Carney, Jr.
Lt. Governor, State of Delaware

The Honorable Matt Denn, Esquire
Insurance Commissioner, State of Delaware

Christopher Frantz, MD
A.I. duPont Hospital for Children

Stephen Grubbs, MD
Medical Oncology Hematology Consultants, PA

The Honorable Bethany Hall-Long
University of Delaware/
Delaware House of Representatives

Patricia Hoge, PhD, RN
American Cancer Society

The Honorable John A. Hughes, Secretary
Department of Natural Resources and
Environmental Control

Meg Maley, RN, BSN
Oncology Care Home Health Specialists, Inc.

The Honorable David McBride
Delaware Senate

Julio Navarro, MD
Glasgow Family Practice

The Honorable Liane Sorenson
Delaware Senate

James Spellman, MD, FACS, FSSO
Beebe Hospital Tunnel Cancer Center

The Honorable Stephanie Ulbrich
Delaware House of Representatives
Colorectal Cancer Committee

Chairperson:
Stephen Grubbs, MD, Medical Oncology Hematology Consultants, PA

Members:
David Cloney, MD, FACS, Atlantic Surgical Associates
Victoria Cooke, Delaware Breast Cancer Coalition
Allison Gil, American Cancer Society
James Gill, MD, MPH, Christiana Care Health Services
Valerie Green, Westside Health Services
Paula Hess, BSN, RN, Bayhealth Medical Center
Nora Katurakes, RN, MSN, OCN, Helen F. Graham Cancer Center
Carolee Polek, RN, MSN, PhD, Delaware Diamond Chapter of the Oncology Nursing Society
Anthony Policastro, MD, Nanticoke Memorial Hospital
Catherine Salvato, MSN, RN, Bayhealth Medical Center

Disparities Committee

Chairperson:
The Honorable Lt. Governor John C. Carney, Jr.

Members:
Semaan Abboud, MD, Lewes Medical & Surgical Associates
The Honorable Matt Denn, Esq., Insurance Commissioner, State of Delaware
Robert Frelick, MD
Helene Gladney, City of Wilmington
Connie Green-Johnson, Quality Insights of Delaware
Lolita A. Lopez, Westside Health Services
Andrew P. Marioni, State Disability Determination Service
Nicolas Petrelli, MD, Helen F. Graham Cancer Center
Jaime H. Rivera, MD, FAAFP, Delaware Division of Public Health
Kathleen C. Wall, American Cancer Society
Mary Watkins, Delaware State University

Environment Committee

Chairperson:
Meg Maley, RN, BSN, Oncology Care Home Health Specialists, Inc.

Members:
Deborah Brown, CHES, American Lung Association of Delaware
The Honorable John A. Hughes, Department of Natural Resources and Environmental Control
The Honorable Liane Sorenson, Delaware Senate
Laurel Standley, Watershed Solutions, LLC
Grier Stayton, Delaware Department of Agriculture
Ann Tyndall, American Cancer Society
The Honorable Stephanie Ulbrich, Delaware House of Representatives

Increase Knowledge & Provide Information Committee

Chairperson:
The Honorable Bethany Hall-Long, PhD, RNC, Delaware House of Representatives, University of Delaware

Members:
Jeanne Chiquoine, American Cancer Society
Jayne Fernsler, DSN, RN, AOCN
Linda Fleisher, MPH, NCI’s Cancer Information Service, Atlantic Region
Arlene S. Littleton, Sussex County Senior Services
H.C. Moore, Delaware Cancer Registrars Association
John Ray, Delaware Department of Education
The Honorable Liane Sorenson, Delaware Senate
Janet Teixeira, MSS, LCSW, Cancer Care Connection
Linda Wolfe, Department of Education

Quality Committee

Chairperson:
Julio Navarro, MD, Glasgow Family Practice

Members:
Paula Breen, MSPH, Cancer Care Connection
Margareta Dorey, RN, BSN, Delaware Pain Initiative, Inc.
Christopher Frantz, MD, A.I. duPont Hospital for Children
Wendy Gainer, Physician’s Advocacy Program, Medical Society of Delaware
Andrea Holecek, RN, MSN, CRNI, AOCN, Bayhealth Medical Center
Susan Lloyd, MSN, RN, Delaware Hospice
Eileen McGrath, American Cancer Society
James Monihan, MD, Allied Diagnostic Pathology
  Consultants, PA
Nicholas Petrelli, MD, Helen F. Graham Cancer Center
Anthony Poliastro, MD, Nanticoke Memorial Hospital
Catherine A. Salvato, MSN, RN, Bayhealth Medical Center
Edward Sobel, DO, Quality Insights of Delaware
James Spellman, MD, FACS, FSSO, Beebe Hospital Tunnel
  Cancer Center

Tobacco Committee
  Chairperson:
  Patricia Hoge, PhD, RN, American Cancer Society
  Members:
  Deborah Brown, CHES, American Lung Association
    of Delaware
  Jeanne Chiquoine, American Cancer Society
