

More choice for all your customers

Cabot offers you – and you offer your customers – dairy bars in fixed weights from economical two-pound bricks to units as small as 3/4-ounce, as well as slices, shreds and traditional 8-ounce shapes. All sized to fit different, discerning consumer lifestyles and enhance recipes while meeting your diverse points of sale.

Increased sales and category growth for you

Cabot consumers buy more kinds of cheese than any other brand:

- Featuring Cabot in your dairy case means proven category growth*
- Cabot does not compete with your house brands*
- Cabot lends a powerful alternative feature to the brands that lead in each category nationally – dairy, shreds and slices.

Naturally Aged Cheddar

Cabot offers classic, robust cheddar flavor to suit a range of palates, from mild slices to Vermont Select premium cheddars. Cabot cheddars are aged to perfection – some for three months, some for more than twelve! Cabot Cheddar uses only our farmers' rigorously-tested, highest-quality milk to craft cheddar that is second to none. Cabot naturally aged Cheddars consistently win awards in national and international cheesemaking competitions, including "the World's Best Cheddar." (A complete listing of the judges and awards is available on our web site.)

Savory Flavored Cheddar

Distinctive, trendy and wholly original, Cabot flavored cheddars are artfully enhanced with flavors right in our starter vats. Some subtle and some bold, each flavor is blended with Cabot cheddar to achieve world-class taste for your dairy case.

Light Cheddar

Before reduced fat was trendy, Cabot invented light cheddar. Cabot is still the only brand that can deliver a light cheddar that melts well (your home-cook customers know how important that is) and delivers a strong cheddar flavor – and Cabot is the only nationally distributed cheddar with half and three-quarters of the fat removed! Every nutritional health association and every women's health magazine has recognized and singled out Cabot's great-tasting light cheddars. It has been our honor to continue the tradition of all-natural, great tasting cheddar for our light cheddars as well.

Monterey Jack & Pepper Jack

Cabot's rich, creamery Jack cheese stands deliciously alone or complemented by plentiful peppers. While not our hallmark cheese, our Jacks beat the competition in terms of flavor, richness, meltability and consistency.
